

# minarai

AI powered dialogue system

## What's minarai?

*Minarai* is a platform to create smart conversational interfaces, using AI. Users state their requests using natural language, and *minarai* processes and addresses them according to the context.

System Automated Communication

Human Operated Communication  
Triggered when the system can't handle the user's request

Implemented a multilingual support system

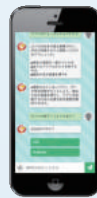

In order to provide a seamless experience for the user, *minarai* allows the conversation to be taken over remotely, upon request, by a human operator. The system profits from these human on human interactions to learn and improve accuracy over time.

## Actual cases & Interfaces

*Minarai* can be deployed in several devices such as robots, digital signage, mobile devices, etc.

Assist airport users showing directions with the use of sounds/images

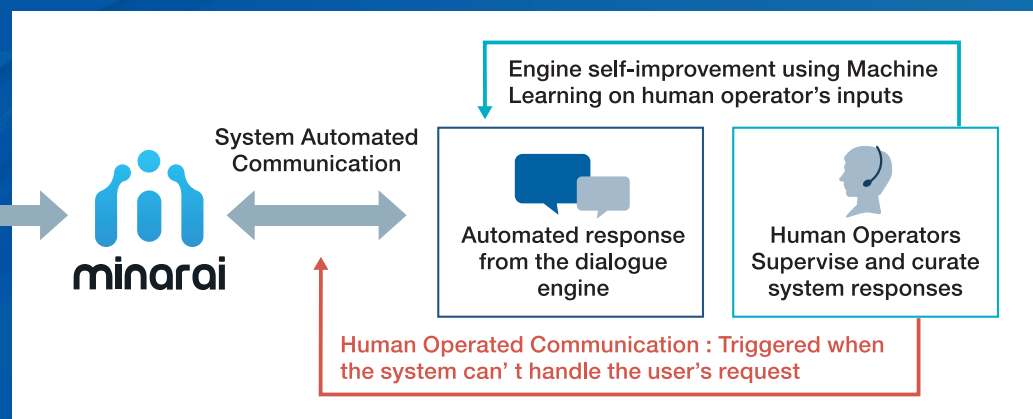

A chatbot for customer service

AI-Samurai  
Installed dialog system for Entertainment

## System Flow
